Summary

Passionate Full Stack Developer with hands-on experience building scalable web applications using Laravel, FastAPI, Django, Vue.js, React.js, and modern backend technologies. Skilled in designing RESTful APIs, authentication systems, multi-tenant architectures, and database optimization using MySQL, PostgreSQL, and MongoDB. Experienced with Docker, Git version control. Strong problem-solving abilities with practical experience developing real-world systems including food delivery platforms, hospital management systems, and AI-powered guidance platforms.

Education

MCA (Master of Computer Applications)
CVM University, ISTAR College 2023 – 2025

- Specialized in Full Stack Development (CGPA: 9.0/10)
- Developed academic projects using Laravel and Bootstrap
- Coursework in Advanced Algorithms and Database Systems

BCA (Bachelor of Computer Applications)
C.U. Shah College, Saurashtra University 2020 – 2023

- Focused on programming fundamentals (CGPA: 7.0/10)
- Database management and web development coursework

Higher Secondary (12th Commerce)
N.M. High School 2020

- Scored 63% with focus on business and IT fundamentals

Secondary (10th)
N.M. High School 2018

- Passed with 63% and strong interest in computers and mathematics

Experience

Brainer Hub Solution
Full Stack Developer Jan 2025 – Present

- Developed web applications using Laravel, FastAPI, Django, and modern JavaScript frameworks
- Built RESTful APIs with JWT authentication, API documentation, and database optimization
- Worked with multi-tenant systems, authentication modules, and scalable backend architecture
- Collaborated in Agile development environments using Git and GitLab workflows

Projects

HungerHop – Multi-Tenant Food Delivery Platform

Enterprise-level food ordering and delivery platform with multi-role architecture for customers, restaurants, delivery partners, and administrators.

- Developed scalable multi-tenant architecture using Laravel 12 with clean architecture principles
- Built REST APIs, wallet system, subscription modules, delivery tracking, and restaurant management
- Implemented role-based access control, authentication, and real-time order workflows
- Optimized database structure with 39+ relational tables and tenant-based isolation

Hospital Management System

Comprehensive hospital administration platform designed to manage patients, doctors, appointments, and medical records efficiently.

- Implemented patient registration, appointment scheduling, billing, and doctor management modules
- Developed secure authentication and role-based access features
- Designed responsive dashboards and reporting functionalities
- Built using Laravel, MySQL, Bootstrap, and RESTful architecture

Technical Skills

Programming:	PHP, Python, JavaScript, TypeScript, SQL, C, C++
Web Technologies:	HTML5, CSS3, REST APIs, AJAX, JSON, JWT Authentication
Frameworks:	Laravel, FastAPI, Django, Vue.js, React.js, Livewire, Bootstrap, jQuery, Node.js
Databases:	MySQL, PostgreSQL, MongoDB
Tools:	Git, GitHub, GitLab, VS Code, Cursor, Antigravity, Docker, Postman, XAMPP, WAMP
Concepts:	Multi-Tenancy, API Development

Certifications

- **Python Certification** - Geekster (Certificate)
- **MySQL Certification** - Geekster (Certificate)

Additional Information

Languages

- English (Professional Working Proficiency)
- Hindi (Native Fluency)
- Gujarati (Native)

Hobbies & Interests

- Photography & Video Editing
- Traveling & Exploring New Places
- Learning New Technologies
